01 Why MBBS Abroad? The Case for Indian Families

Every year, over 20 lakh Indian students appear for NEET. Only around 1 lakh secure a government MBBS seat. The remaining 19 lakh — talented, hardworking students who cleared one of the world's toughest entrance exams — are left searching for an alternative. Private MBBS in India costs ₹80 lakh to ₹2 crore at management and deemed university seats, placing it beyond the reach of most families.

MBBS abroad is not a backup plan. It is an established, NMC-recognised pathway that has produced thousands of practising Indian doctors over the past three decades. The key difference is cost — total programme costs abroad range from ₹18 lakh to ₹45 lakh, including tuition, hostel, food, and travel for the entire duration.

Cost Reality Check

Option	Total Cost (6 years)	Seats Available
Government MBBS in India	₹5 – 10L	~1,00,000
Private MBBS in India	₹80L – ₹2 Cr	Limited
MBBS Abroad (Kyrgyzstan)	₹18 – 28L	Open
MBBS Abroad (Uzbekistan)	₹20 – 30L	Open
MBBS Abroad (Russia)	₹22 – 38L	Open
MBBS Abroad (Armenia)	₹22 – 30L	Open
MBBS Abroad (Georgia)	₹28 – 42L	Open
MBBS Abroad (Bangladesh)	₹30 – 45L	Open

** Nepal MBBS total cost: ₹50–70L — higher due to Indian-curriculum premium universities like BPKIHS.*

Key advantages of MBBS abroad:

- ✓ NMC-approved degree — valid to practise in India after clearing FMGE/NExT
- ✓ English-medium instruction at most universities
- ✓ No donation, no capitation fees
- ✓ Modern hospital infrastructure with hands-on clinical training
- ✓ Large Indian student communities in every major destination
- ✓ Structured pathway: 5–6 year MBBS + internship + FMGE/NExT = full Indian licence

02 Is It Safe? Addressing Every Parent's Fear

Safety is the first question every parent asks — and rightly so. The good news is that all eight countries we work with have established Indian student communities, dedicated Indian hostels, Indian food options, and active student support networks.

Country	Safety Rating	Indian Community	Indian Food
Russia	Moderate	Very Large	Available
Uzbekistan	High	Large & Growing	Widely Available
Georgia	Very High	Large	Available
Kazakhstan	High	Growing	Available
Kyrgyzstan	Moderate-High	Established	Available
Armenia	High	Small but growing	Limited
Bangladesh	Moderate	Large	Widely Available
Nepal	High	Very Large	Everywhere

What we do to ensure your child's safety:

- ✓ We only recommend universities with dedicated Indian student hostels
- ✓ We maintain contact with student welfare officers at each university
- ✓ We provide emergency contact numbers for every destination
- ✓ We conduct pre-departure briefings covering local laws, customs, and safety protocols
- ✓ Our students can reach us 24/7 for any emergency
- ✓ We stay connected with students throughout all 6 years — not just during admission

03 NMC Approval — The Most Important Check

The National Medical Commission (NMC) is India's medical education regulator. For an MBBS degree earned abroad to be valid in India, the university must appear on the NMC's approved list. This is the single most important criterion — everything else is secondary.

WARNING: Many universities aggressively market to Indian students but are NOT on the NMC approved list. A degree from a non-NMC university is worthless in India — your child cannot even sit for FMGE/NExT. Always verify at nmc.org.in before paying any fees.

Abroad Visions works exclusively with NMC-approved institutions. We do not recommend universities in the Philippines despite the high commission they offer — because their NMC compliance record is inconsistent and has led to real cases of Indian students being unable to practise in India.

NMC Screening Test requirements (as of 2025):

- Student must have completed MBBS from an NMC-approved foreign institution
- Must have completed 12 months of internship (rotating)
- Must appear for FMGE (Foreign Medical Graduates Examination) — now transitioning to NExT
- Pass mark: 150/300 (50%) in FMGE
- No limit on number of attempts for FMGE (check latest NMC notifications)

04 FMGE / NExT Explained

The Foreign Medical Graduates Examination (FMGE) is a screening test conducted by the National Board of Examinations (NBE). Any Indian citizen who has completed MBBS from a foreign university must clear FMGE before practising medicine in India. The NExT (National Exit Test) is being introduced as a unified exam for both Indian and foreign graduates — making FMGE preparation more critical than ever.

FMGE Pass Rates by Country/University (2024 Data)

University / Country	FMGE Pass Rate	Our Recommendation
Tashkent Medical Academy (Uzbekistan)	~65-70%	Top Pick
Perm State Medical University (Russia)	Up to 100%*	Highly Recommended
BP Koirala Institute (Nepal)	71%	Premium Option
Georgia (Top Universities)	55-65%	Recommended
Kyrgyzstan (KRSU)	~40%	Budget Option
Armenia - Progress Medical Univ.	Above Average	Niche Pick
Bangladesh (Average)	~32%	Selective
Overall India Average (FMGE 2024)	~20-25%	Benchmark

** Select batches at Perm State have achieved 100% pass rates. Individual results vary.*

How to prepare for FMGE/NExT while studying abroad:

- Choose a university with a structured NExT/FMGE preparation programme
- Start FMGE preparation from Year 3 — not after returning to India
- Join online coaching (PrepLadder, MarrowApp) from Year 4
- Attend revision camps in India during summer breaks
- Choose a university where clinical exposure is strong — FMGE tests clinical reasoning

05 Country-by-Country Comparison

Russia ■■

Total Cost: ■22 – 38L	Duration: 6 years	Intake: September	Language: English / Russian
Advantages ✓ Largest Indian MBBS community of any country abroad ✓ Decades of graduates practising in India — proven track record ✓ Wide range of universities at different price points ✓ Strong science-based curriculum		Considerations • FMGE pass rates vary widely by university — choose carefully • Russian language required for patient interaction • Cold climate in most cities <i>Best for: Families with moderate budgets wanting the most established route</i>	

Uzbekistan ■■

Total Cost: ■20 – 30L	Duration: 6 years	Intake: Sep / Oct	Language: English
Advantages ✓ Excellent value — among the lowest cost with strong academics ✓ Indian food widely available, familiar culture ✓ Safe, stable country with a growing Indian student presence ✓ Strong FMGE outcomes at top universities		Considerations • Not all universities are equal — shortlisting matters • Limited extracurricular options vs Russia or Georgia <i>Best for: Our most recommended destination for most Indian families</i>	

Georgia ■■

Total Cost: ■28 – 42L	Duration: 6 years	Intake: Sep / Feb	Language: English
Advantages ✓ European academic framework — highest academic standard among destinations ✓ Two intakes per year ✓ One of the safest countries for international students ✓ Vibrant expat community		Considerations • Higher cost than most other destinations • Only private universities admitted from 2026 <i>Best for: Families prioritising academic quality and are comfortable with higher fees</i>	

Kazakhstan ■■

Total Cost: ■25 – 38L	Duration: 5 yrs + 1 yr internship	Intake: Jun / Sep	Language: English
------------------------------	--	--------------------------	--------------------------

Advantages

- ✓ Modern university infrastructure with well-equipped teaching hospitals
- ✓ Two intake windows — June and September
- ✓ Growing reputation for clinical training quality

Considerations

- Fewer universities have long FMGE track records
- Colder climate in northern cities

Best for: Students prioritising clinical training and hands-on hospital exposure

Kyrgyzstan ■■**Total Cost:** ■18 – 28L**Duration:** 6 years**Intake:** Aug / Sep**Language:** English**Advantages**

- ✓ Most affordable NMC-approved destination available
- ✓ Established Indian student communities
- ✓ KRSU has the highest FMGE rate in the country

Considerations

- University selection is critical — quality varies significantly
- Lower FMGE pass rates on average

Best for: Budget-conscious families — only with careful university selection

Armenia ■■**Total Cost:** ■22 – 30L**Duration:** 6 years**Intake:** Sep / Oct**Language:** English**Advantages**

- ✓ Georgia-level academic standards at lower fees
- ✓ Progress Medical University has its own teaching hospital
- ✓ Small batch sizes — more individual attention

Considerations

- Limited university options in the country
- Smaller Indian community

Best for: Families wanting European standards on a tighter budget

Bangladesh ■■**Total Cost:** ■30 – 45L**Duration:** 5 yrs + 1 yr
internship**Intake:** Jan / Jul**Language:** English**Advantages**

- ✓ Two intakes per year — flexible timing
- ✓ Culturally familiar — Bengali culture, Indian food everywhere
- ✓ Shorter 5-year MBBS programme
- ✓ Geographically close to India

Considerations

- Costs are higher than comparable destinations
- FMGE pass rates are average

Best for: Families in eastern/northeastern India seeking cultural comfort

Nepal ■■**Total Cost:** ■50 – 70L**Duration:** 5.5 years**Intake:** Aug / Sep**Language:** English /
Hindi

Advantages

- ✓ Indian-aligned curriculum — smoothest FMGE/NExT preparation
- ✓ Hindi-speaking environment
- ✓ Very large Indian student community
- ✓ BPKIHS: 71% FMGE pass rate

Considerations

- Highest cost among abroad destinations
- Premium pricing at top universities

Best for: Families prioritising FMGE success and cultural familiarity over cost

06 Cost Breakdown — What You Actually Pay

Many consultants quote only tuition fees. The real cost includes hostel, food, travel, visa, insurance, and incidentals. Below is a transparent breakdown for our most recommended destinations. All figures are total for the complete programme.

Cost Head	Uzbekistan	Russia	Georgia	Kyrgyzstan	Armenia
Tuition (total)	■12–18L	■14–24L	■18–28L	■10–16L	■14–20L
Hostel (total)	■3–5L	■3–6L	■4–7L	■3–5L	■3–5L
Food (total)	■3–5L	■3–5L	■4–6L	■3–5L	■3–5L
Travel (return × years)	■1–2L	■1–3L	■1–2L	■1–2L	■1–2L
Visa / Insurance	■0.5L	■0.5L	■0.5L	■0.5L	■0.5L
Misc / Incidentals	■0.5–1L	■0.5–1L	■0.5–1L	■0.5–1L	■0.5–1L
TOTAL RANGE	■20–30L	■22–38L	■28–42L	■18–28L	■22–30L

TIP: Always ask for the TOTAL programme cost in writing — not just first-year fees. A university quoting ■3L/year for 6 years is ■18L tuition — but add hostel, food, travel and you are at ■28–32L. Abroad Visions provides a full transparent breakdown before you commit to anything.

07 How to Choose the Right University

With 200+ NMC-approved universities across 8 countries, the choice can be overwhelming. At Abroad Visions, we use a structured 6-factor framework to shortlist the right 2–3 universities for each student based on their individual profile.

1. NMC Approval Status

Verify directly at nmc.org.in. Non-negotiable.

2. FMGE / NExT Pass Rate

Ask for batch-wise FMGE data for the last 3 years. Beware of inflated claims — ask for the NMC data reference.

3. Hospital Affiliation

The university must have its own teaching hospital or a formal affiliation with a government hospital for clinical training.

4. Indian Student Community

A strong Indian student community means better peer support, familiar food options, and cultural comfort.

5. Hostel Quality & Safety

Inspect hostel photos, read student reviews, and confirm whether the hostel is on-campus or off-campus.

6. Total Fee Transparency

Any university or consultant who cannot give you a written total cost breakdown is a red flag. Get everything in writing.

08 The Admission Process — Step by Step

Step 1	Free Counselling Call We understand your NEET score, budget, family priorities, and location preference. We map the right country and university options in one honest conversation. No charge, no obligation.
Step 2	University Shortlist We prepare a personalised comparison of 2–3 best-fit universities with full cost breakdowns, FMGE data, hostel details, and intake dates.
Step 3	Application Submission We handle all documentation and submit your application to the university on your behalf. Documents required: NEET scorecard, 10th/12th marksheets, passport, photographs.
Step 4	Offer Letter University issues a conditional or unconditional offer letter within 2–4 weeks of application.
Step 5	Fee Payment & Confirmation First-year tuition is paid to confirm the seat. We guide you through the secure payment process and obtain the official receipt and enrollment confirmation.
Step 6	Student Visa Application We assist with the complete visa application — invitation letter, medical tests, financial documents, and embassy appointment where required.
Step 7	Pre-Departure Briefing We brief the student and family on what to carry, currency, SIM cards, climate, local customs, and emergency contacts at the destination.
Step 8	Arrival & Ongoing Support We coordinate airport pickup, hostel check-in, university registration, and bank account opening. Our support continues throughout all 6 years of the programme.

09 Eligibility & Documents Required

Basic Eligibility Criteria

Criterion	Requirement
Age	17 years or above at time of admission
NEET	Must have qualified NEET (compulsory from 2018)
Minimum NEET Score	No minimum cutoff set by most universities abroad
Class 12 Marks	Minimum 50% in Physics, Chemistry, Biology (PCB)
Class 12 Marks (SC/ST/OBC)	Minimum 40% in PCB
Medium of Instruction	Most universities: English medium

Documents Checklist

- ✓ Valid Indian Passport (minimum 18 months validity)
- ✓ NEET Scorecard (original + attested copy)
- ✓ Class 10 Marksheet & Certificate
- ✓ Class 12 Marksheet & Certificate
- ✓ 10 Passport-size Photographs (white background)
- ✓ Birth Certificate
- ✓ Medical Fitness Certificate (from registered doctor)
- ✓ HIV Test Report (required by some countries)
- ✓ Gap Certificate (if applicable)
- ✓ Bank Statement (showing financial capacity — some universities require)
- ✓ Notarised / Apostille documents (required by Russia, Georgia, Kazakhstan)

Note: Abroad Visions guides you through the exact document requirements for your specific destination — requirements vary by country and university.

10 Life Abroad — Hostels, Food & Student Life

Student life abroad is one of the most common concerns for both students and parents. The reality is that all eight of our destination countries have well-established Indian student communities with full support infrastructure.

Hostels

- Most universities offer on-campus hostels — safe, supervised, and convenient
- Single and shared room options available
- 24/7 security and warden presence at recommended institutions
- Monthly hostel costs: ■4,000–10,000 per month depending on destination

Food

- Indian mess / canteen available at most universities we recommend
- Indian grocery stores present in all major student cities
- Monthly food budget: ■6,000–12,000 per month
- Vegetarian and non-vegetarian options both available

Communication

- Local SIM cards available at airport — we guide you on which to buy
- WhatsApp and video calling work normally in all destinations
- Students typically call home daily — no communication barriers

Banking & Money

- Carry initial cash in USD (convert to local currency on arrival)
- Most destinations have Indian bank correspondent branches
- Online transfers via Wise / bank wire are standard
- Monthly living expenses: ■15,000–25,000 depending on destination

11 Red Flags — How to Spot a Bad Consultant

The MBBS abroad industry has many unethical players. Every year, Indian families lose lakhs of rupees — and students lose years of their lives — to fraudulent consultants and universities. Here is what to watch out for:

!

They push Philippines aggressively

Philippines MBBS has had recurring NMC compliance issues. Consultants pushing it hard are almost always doing so for high commission — not your child's interest.

!

No clear answer on FMGE pass rates

Any consultant who cannot provide university-specific FMGE data for the last 3 years is either uninformed or hiding poor outcomes.

!

They quote only first-year fees

A classic trick. Always ask for the TOTAL 6-year cost in writing.

!

Pressure to decide immediately

Legitimate consultants do not create artificial urgency. 'Seats filling up' pressure is a sales tactic, not a fact.

!

No registration or physical office

Verify the consultant has a registered office address and can be held accountable.

!

They cannot show you the NMC approval certificate

The NMC list is public at nmc.org.in. Any university not on it is a non-starter.

!

They ask for cash payments

All legitimate payments should be to the university directly via bank transfer. Cash to a consultant is a major red flag.

12 The Abroad Visions Difference

Abroad Visions has been guiding Indian families through MBBS abroad admissions for over 10 years, from our office in Najibabad, District Bijnor, Uttar Pradesh. Over 1,000 students have been placed through us across 8 countries and 200+ universities.

Zero Counselling Fee

We charge nothing for counselling. Our revenue comes from university partnerships — which does not influence our recommendations.

FMGE-First Shortlisting

Every university we recommend is evaluated on FMGE/NExT pass rate data first. We do not recommend any institution with poor track records regardless of the commission they offer.

No Philippines Policy

We have never recommended Philippines MBBS due to NMC compliance concerns. This has cost us commission income. We believe it is the right call.

Full Transparency on Costs

We provide a written total cost breakdown before any payment is made. No surprises after admission.

6-Year Support

We stay connected with every student throughout their programme — not just during admission. Emergency support available 24/7.

Local Presence

We are based in Najibabad, UP — a real office with real people you can walk in to meet. We are accountable.

10 Years Experience

Over a decade of placing students, navigating NMC rule changes, managing visa complications, and supporting students through every challenge abroad.

13 Frequently Asked Questions

Q: Is a foreign MBBS degree valid in India?

A: Yes — provided the university is on the NMC approved list and the graduate clears FMGE/NExT. Thousands of Indian doctors practising today hold foreign MBBS degrees.

Q: What is the minimum NEET score required?

A: Most foreign universities do not set a minimum NEET score. However, you must have qualified NEET (any score above the cutoff) as it is mandatory by NMC rules.

Q: Can I get a bank loan for MBBS abroad?

A: Yes. Most nationalised banks (SBI, Bank of Baroda, Canara Bank) offer education loans for MBBS abroad. Loan amounts up to ₹30–50L are available with collateral. We guide families through the loan process.

Q: What happens if I fail FMGE?

A: There is no limit on FMGE attempts. Students who do not clear on the first attempt can re-appear. However, we strongly recommend choosing a university with strong FMGE preparation support to clear it in the first attempt.

Q: Is it safe for girls to study abroad?

A: Yes. All universities we recommend have dedicated hostels for female students with 24/7 security. Georgia and Armenia are particularly safe for female students.

Q: Do I need to learn the local language?

A: Classes are in English at all recommended universities. However, learning basic local language phrases is helpful for daily life and patient interaction in clinicals.

Q: What is the process for internship?

A: Internship (12 months) can be completed at the foreign university's hospital or returned to India. Rules vary by country — we advise on the best approach.

Q: Can I transfer to an Indian college mid-way?

A: NMC rules generally do not permit transfer of credits from foreign universities to Indian colleges. This is a rare scenario — consult us for specific cases.

Q: How is Abroad Visions different from other consultants?

A: We charge zero counselling fee, recommend only NMC-approved universities, use FMGE data to guide every shortlist, and provide support throughout all 6 years — not just at admission. We have never recommended Philippines MBBS.

14 Next Steps — How to Get Started

Getting started with Abroad Visions is simple and completely free. Here is what happens from your first contact:

1 Call or WhatsApp us

Reach us at 9084676999 or 7417799550. Tell us your NEET score, budget range, and preferred destination if any. If you are unsure, that is fine too.

2 Free counselling session

We schedule a call (30–45 minutes) with you and your family. We map the right options honestly — including telling you if a destination is not suitable.

3 Receive your personalised shortlist

Within 48 hours, we send you a detailed comparison of 2–3 best-fit universities with full cost breakdowns and FMGE data.

4 Visit our office (optional)

Our office is in Najibabad, Dist. Bijnor, UP. Families within reach are welcome to visit in person.

5 Proceed at your pace

We never pressure for a quick decision. Admissions run on university timelines — we advise you when to act and when you have time.

Ready to start?
